Atty Docket No.: 60136.0097USI1

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-99. (Cancelled)

100-168. (Cancelled)

169. (New) A method for profiling iTV users, comprising:

gathering user-related profile data by monitoring interactions between an iTV user and an iTV to extract data received at the iTV, data transmitted by the user from the iTV and interactions between the user and the iTV;

storing the gathered user-related profile data in an interaction database;

periodically retrieving the gathered user-related profile data in the interaction

database;

170.

building a profile associated with the user of the iTV based on retrieving the gathered user-related profile data in the interaction database and data in a local categorized program database; and

presenting programming recommendations in an interactive program guide presenting programs rearranged to reflect a predicted interest of the user based on the profile associated with the user.

user-related profile data in the interaction database once the profile of the user is developed to protect the privacy of the user by preventing the user from being matched to

(New) The method of claim 169 further comprising erasing all of the

the user-related profile data in the interaction database.

Amendment dated February 25, 2009

Atty Docket No.: 60136.0097USI1

171. (New) The method of claim 169, wherein the gathering user-related

profile data further comprises identifying demographic information associated with the

user.

172. (New) The method of claim 169, wherein the gathering user-related

profile data further comprises identifying psychographic information.

173. (New) The method of claim 169, wherein the gathering user-related

profile data by monitoring interactions between an iTV user and an iTV to extract data

received at the iTV, data transmitted by the user from the iTV and interactions between

the user and the iTV further comprises identifying a program watched by the user.

174. (New) The method of claim 169, wherein the gathering user-related

profile data by monitoring interactions between an iTV user and an iTV to extract data

received at the iTV, data transmitted by the user from the iTV and interactions between

the user and the iTV further comprises associating a plurality of programs with content-

associated profile information of viewers of the program watched by the user.

175. (New) The method of claim 169, wherein the building a profile

associated with the user of the iTV based on the gathered user-related profile data in the

interaction database and data in a local categorized program database further comprises

combining the profiles of the programs viewed by the user to the developed profile of the

user using an averaging algorithm.

Atty Docket No.: 60136.0097USI1

176. (New) The method of claim 169, further comprising receiving a plurality

of advertisements selected using the profile associated with the user of the iTV.

177. (New) The method of claim 176, further comprising selecting one of the

plurality of advertisements for presentation to the user via the iTV based on

demographics associated with the profile of the user.

178. (New) The method of claim 169, wherein the building a profile

associated with the user of the iTV based on the gathered user-related profile data in the

interaction database and data in a local categorized program database further comprises

associating a plurality of URLs with the profile associated with the user of the iTV.

179. (New) The method of claim 169, wherein the building a profile

associated with the user of the iTV based on the gathered user-related profile data in the

interaction database and data in a local categorized program database further comprises

building a profile associated with the user of the iTV based on the gathered user-related

profile data in the interaction database and data in a database developed by a television

program ratings service and a web site ratings service.

Amendment dated February 25, 2009

Atty Docket No.: 60136.0097USI1

180. (New) A set-top box for profiling iTV users, comprising:

memory for providing an interaction database; and

a processor, coupled to the memory, the processor being configured to gather

user-related profile data by monitoring interactions between an iTV user and an iTV to

extract data received at the iTV, data transmitted by the user from the iTV and

interactions between the user and the iTV, to store the gathered user-related profile data

in the interaction database, to periodically retrieve the gathered user-related profile data

in the interaction database, to build a profile associated with the user of the iTV based on

retrieving the gathered user-related profile data in the interaction database and data in a

local categorized program database and to present programming recommendations in an

interactive program guide presenting programs rearranged to reflect a predicted interest

of the user based on the profile associated with the user.

181. (New) The method of claim 180, wherein the processor is further

configured to erase all of the user-related profile data in the interaction database once the

profile of the user is developed to protect the privacy of the user by preventing the user

from being matched to the user-related profile data in the interaction database.

182. (New) The method of claim 180, wherein the processor is further

configured to gather demographic information to build the profile associated with the

user of the iTV.

Atty Docket No.: 60136.0097USI1

183. (New) The method of claim 180, wherein the processor is further

configured to gather psychographic information to build the profile associated with the

user of the iTV.

184. (New) The method of claim 180, wherein the processor is further

configured to identify a program selected for viewing by the user of the iTV.

185. (New) The method of claim 180, wherein the processor is further

configured to associate a plurality of programs with content-associated profile

information of viewers of the programs.

186. (New) The method of claim 180, wherein the processor is further

configured to combine the profiles of the programs viewed by the user to the developed

profile of the user using an averaging algorithm.

187. (New) The method of claim 180, wherein the processor is further

configured to receive a plurality of advertisements selected using the profile associated

with the user of the iTV.

188. (New) The method of claim 180, wherein the processor is further

configured to associate a plurality of URLs with the profile associated with the user of

the iTV.

Atty Docket No.: 60136.0097USI1

189. (New) The method of claim 180, wherein the processor is further

configured to build a profile associated with the user of the iTV based on the gathered

user-related profile data in the interaction database and data in a database developed by a

television program ratings service and a web site ratings service.

190. (New) A computer readable medium including executable instructions

which, when executed by a processor, provides profiling iTV users, by:

gathering user-related profile data by monitoring interactions between an iTV user

and an iTV to extract data received at the iTV, data transmitted by the user from the iTV

and interactions between the user and the iTV;

storing the gathered user-related profile data in an interaction database;

periodically retrieving the gathered user-related profile data in the interaction

database;

building a profile associated with the user of the iTV based on retrieving the

gathered user-related profile data in the interaction database and data in a local

categorized program database; and

presenting programming recommendations in an interactive program guide

presenting programs rearranged to reflect a predicted interest of the user based on the

profile associated with the user.

Atty Docket No.: 60136.0097USI1

191. (New) The computer readable medium of claim 190 further comprising

erasing all of the user-related profile data in the interaction database once the profile of

the user is developed to protect the privacy of the user by preventing the user from being

matched to the user-related profile data in the interaction database.

192. (New) The computer readable medium of claim 190, wherein the

gathering user-related profile data further comprises identifying demographic information

associated with the user.

193. (New) The computer readable medium of claim 190, wherein the

gathering user-related profile data further comprises identifying psychographic

information.

194. (New) The computer readable medium of claim 190, wherein the

gathering user-related profile data by monitoring interactions between an iTV user and an

iTV to extract data received at the iTV, data transmitted by the user from the iTV and

interactions between the user and the iTV further comprises identifying a program

watched by the user.

Amendment dated February 25, 2009

Reply to Office Action of October 22, 2008 Atty Docket No.: 60136.0097USI1

195. (New) The computer readable medium of claim 190, wherein the

gathering user-related profile data by monitoring interactions between an iTV user and an

iTV to extract data received at the iTV, data transmitted by the user from the iTV and

interactions between the user and the iTV further comprises associating a plurality of

programs with content-associated profile information of viewers of the programs watched

by the user.

196. (New) The computer readable medium of claim 190, wherein the

building a profile associated with the user of the iTV based on the gathered user-related

profile data in the interaction database and data in a local categorized program database

further comprises combining the profiles of the programs viewed by the user to the

developed profile of the user using an averaging algorithm.

197. (New) The computer readable medium of claim 190, further comprising

receiving a plurality of advertisements selected using the profile associated with the user

of the iTV.

198. (New) The computer readable medium of claim 190, wherein the

building a profile associated with the user of the iTV based on the gathered user-related

profile data in the interaction database and data in a local categorized program database

further comprises associating a plurality of URLs with the profile associated with the

user of the iTV.
